Manual

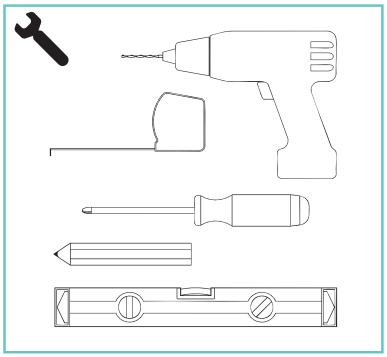

Adagio

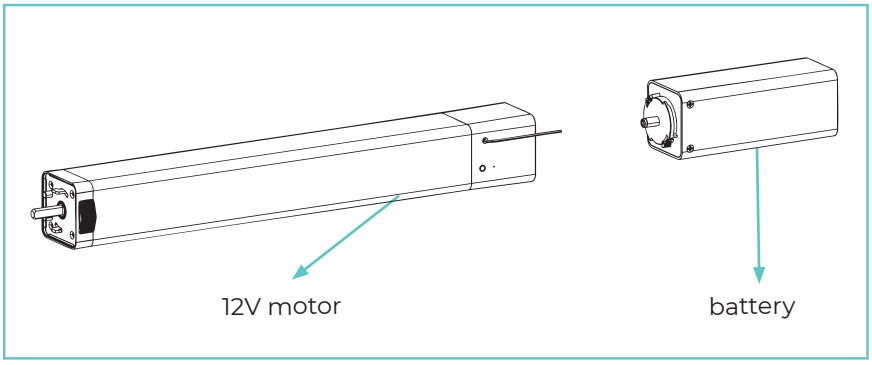

DIAZ | SUNPROTECTION

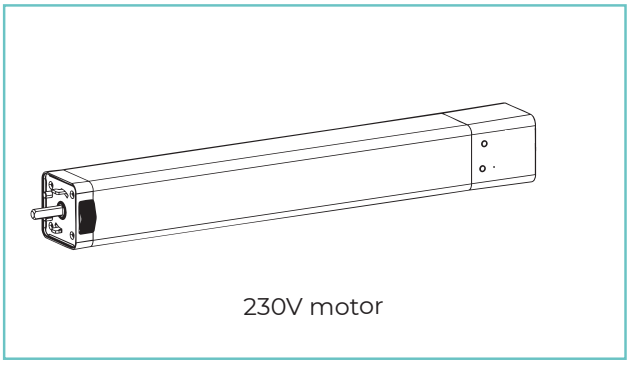

Introduction

Read this manual carefully before installing and using the product. Installation can be carried out by non-professionals. For indoor use only.

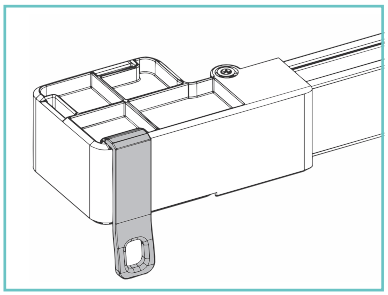

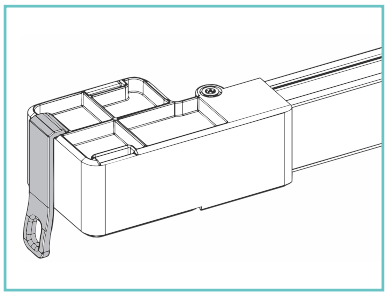

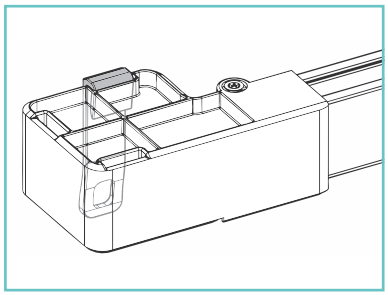

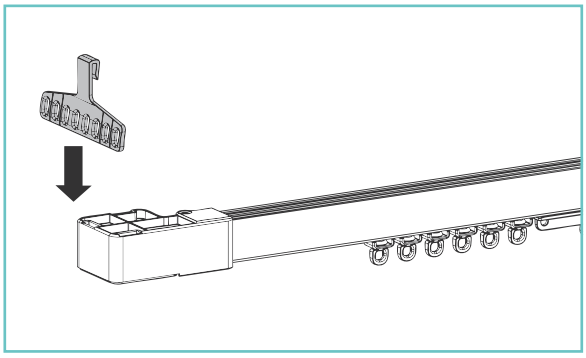

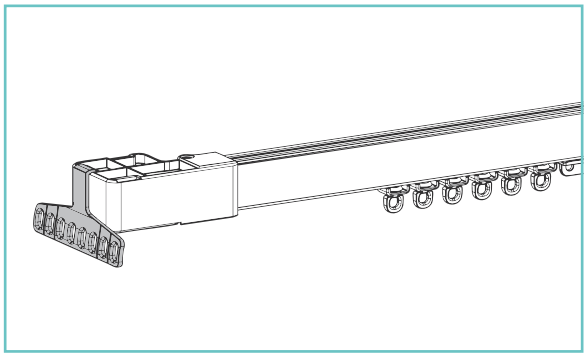

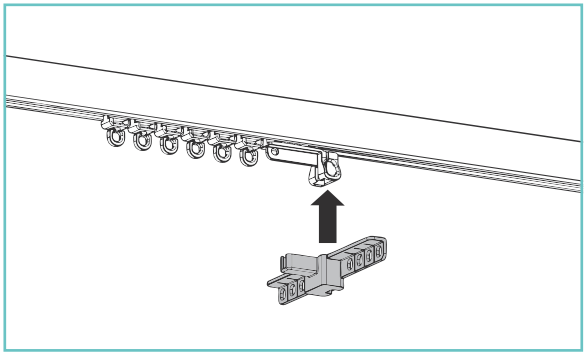

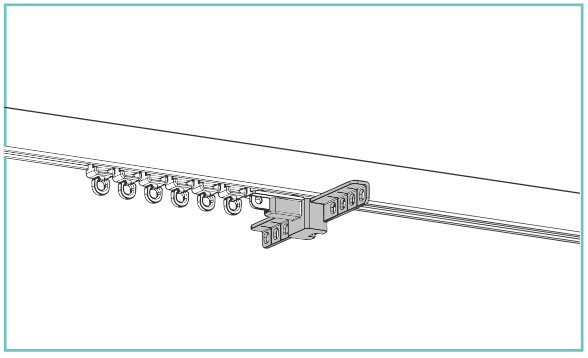

Mounting the motor hooks

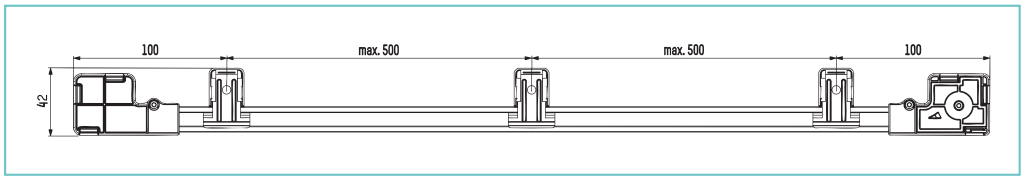

1 Attachment of the motor hook with standard equipment,
this is possible in various places on the end cap.

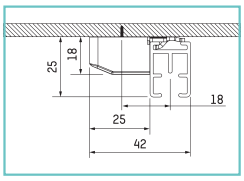

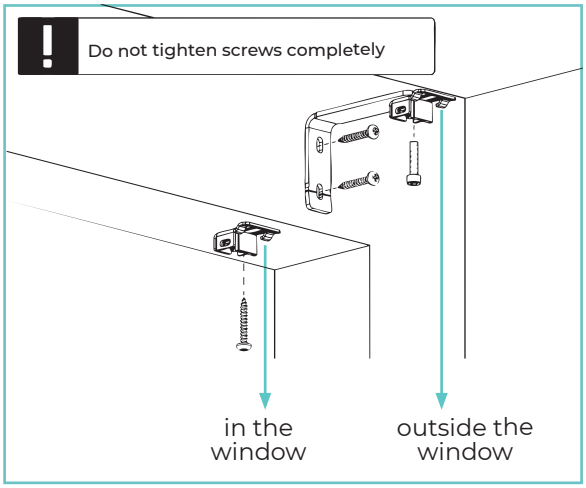

2 Attachment of the motor hook and master carrier with twist confection.

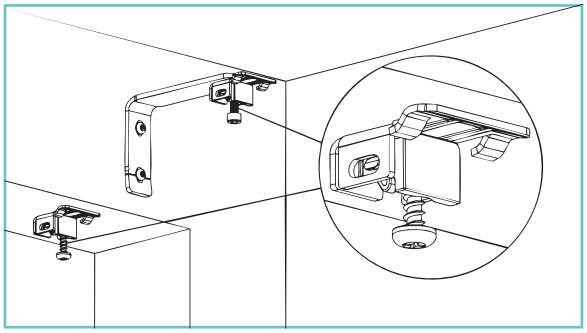

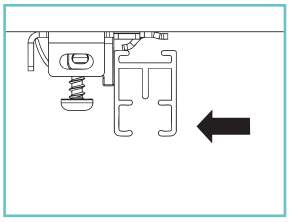

Mounting the brackets

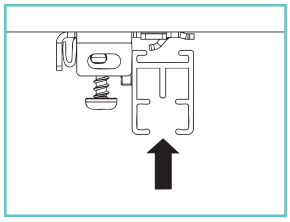

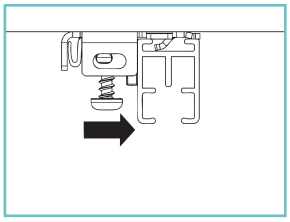

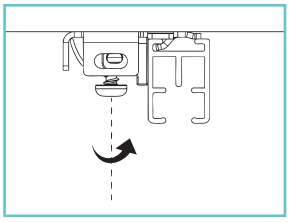

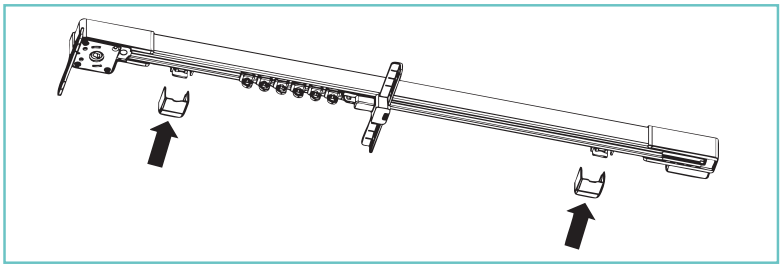

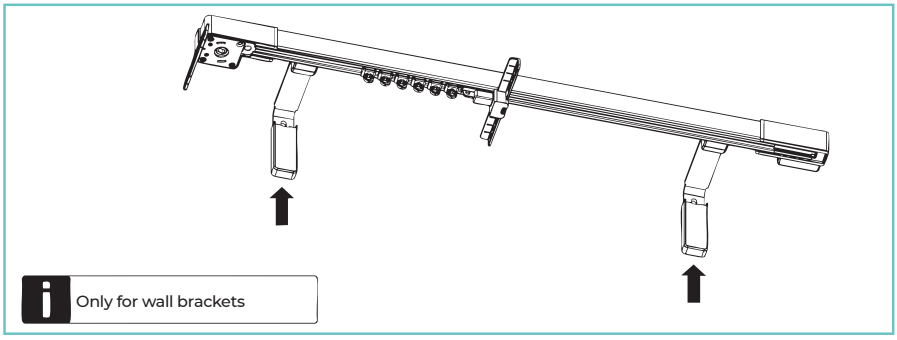

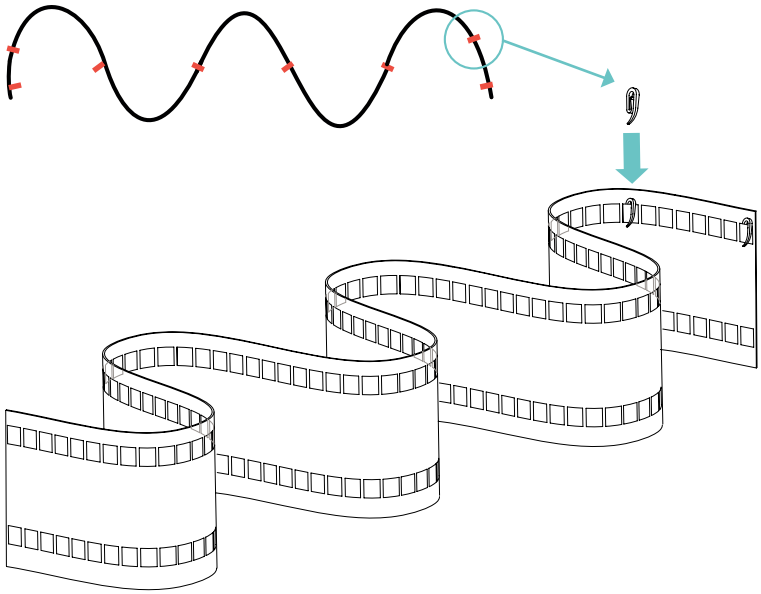

Attach Twist curtain to rail

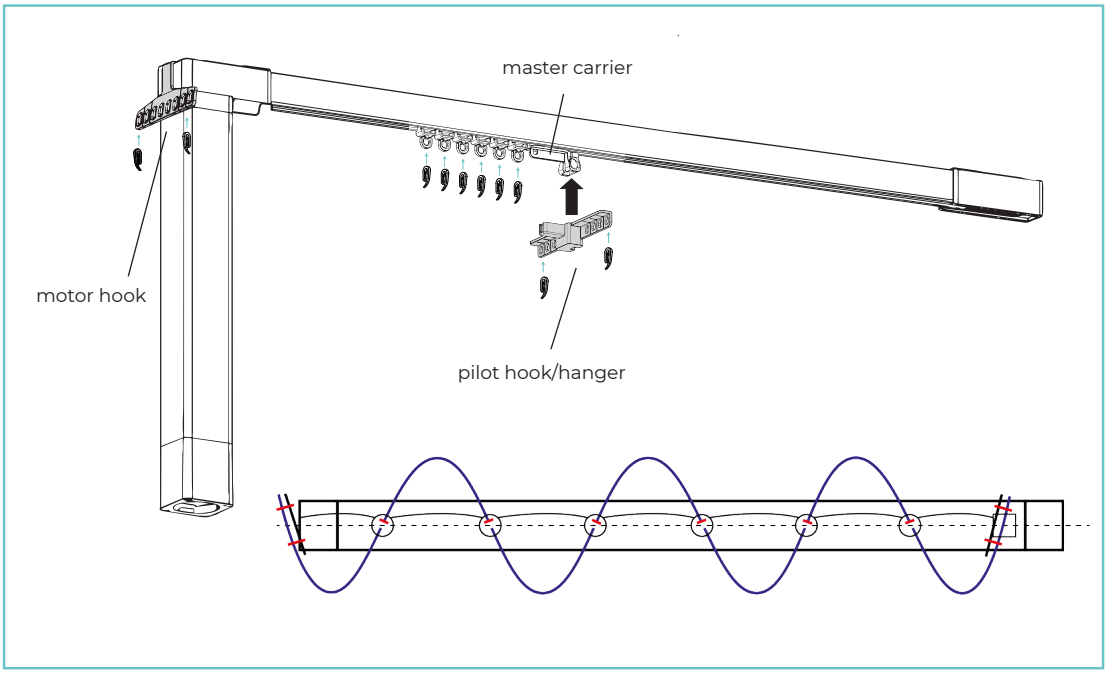

1 Attach the additional hook 6 pockets from the outer hook.

The additio-nal hook can be found on the rail

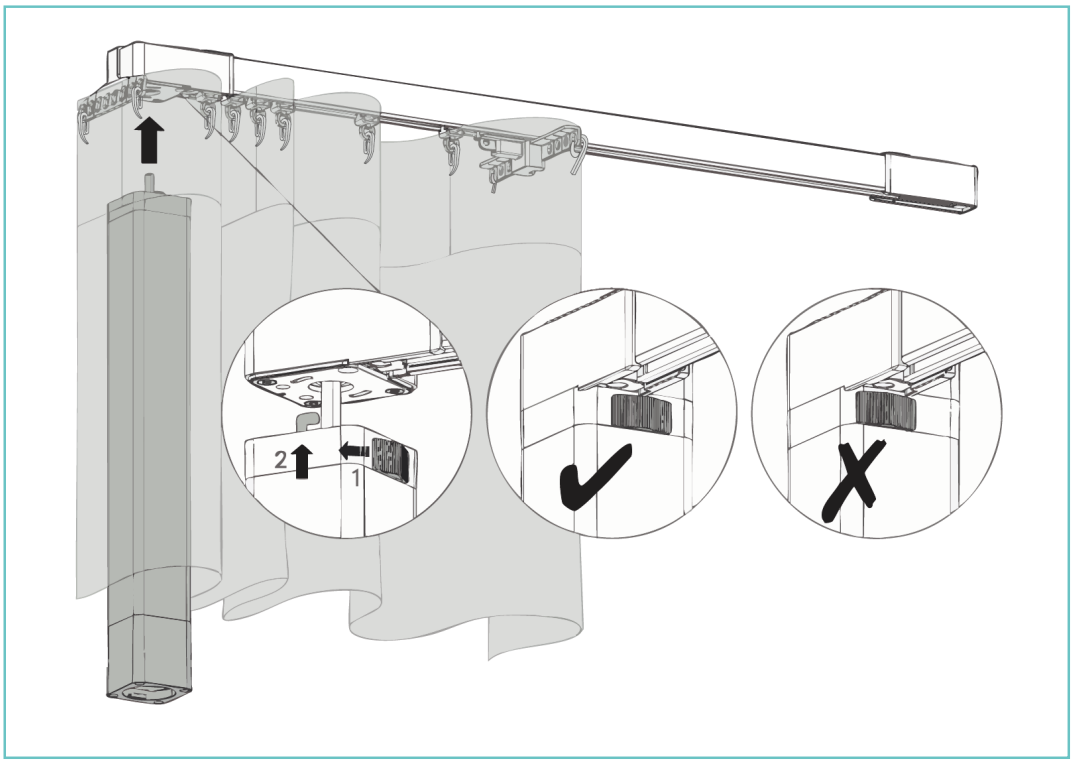

2 Attach the first 2 hooks in the pilot hook/hanger onto the master carrier.

3 Remove all the hooks from the curtain this way.
The last hooks need to be attached on the motor hook on the motor.

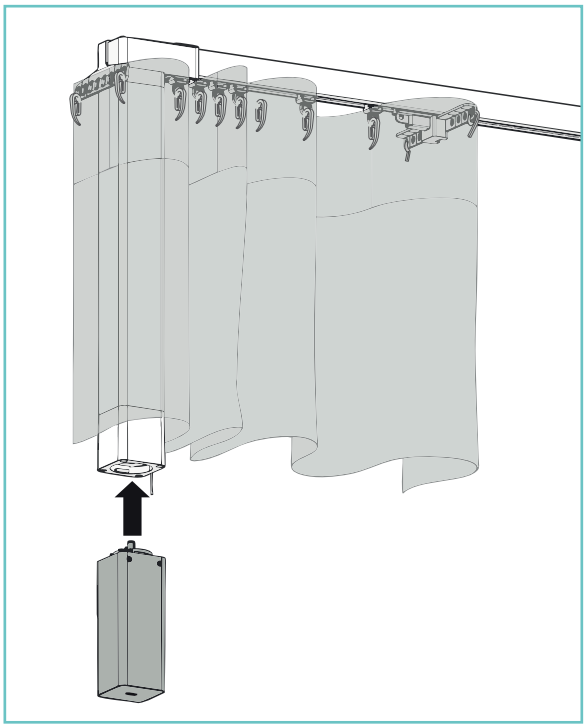

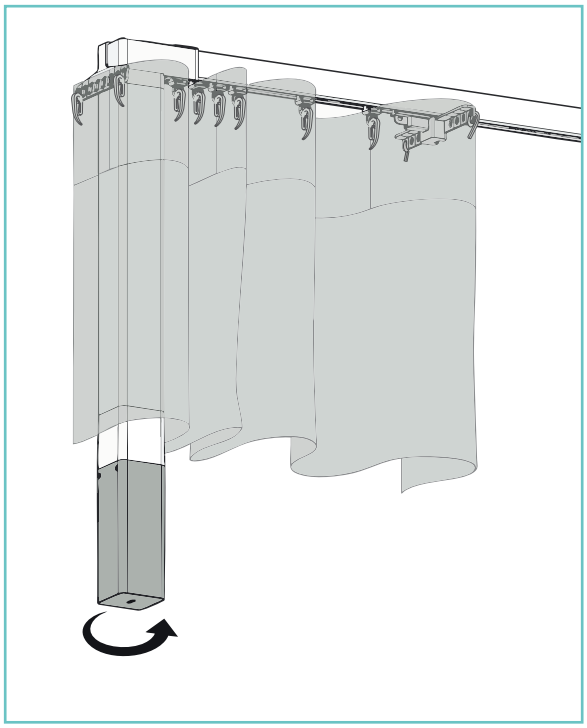

ATTENTION for Twist runners: we send you the rail with the runners in open position. Please do not move the runners before installation of the rail, otherwise the Twist cord can get tangled in the runners.

Mounting the motor to the rail

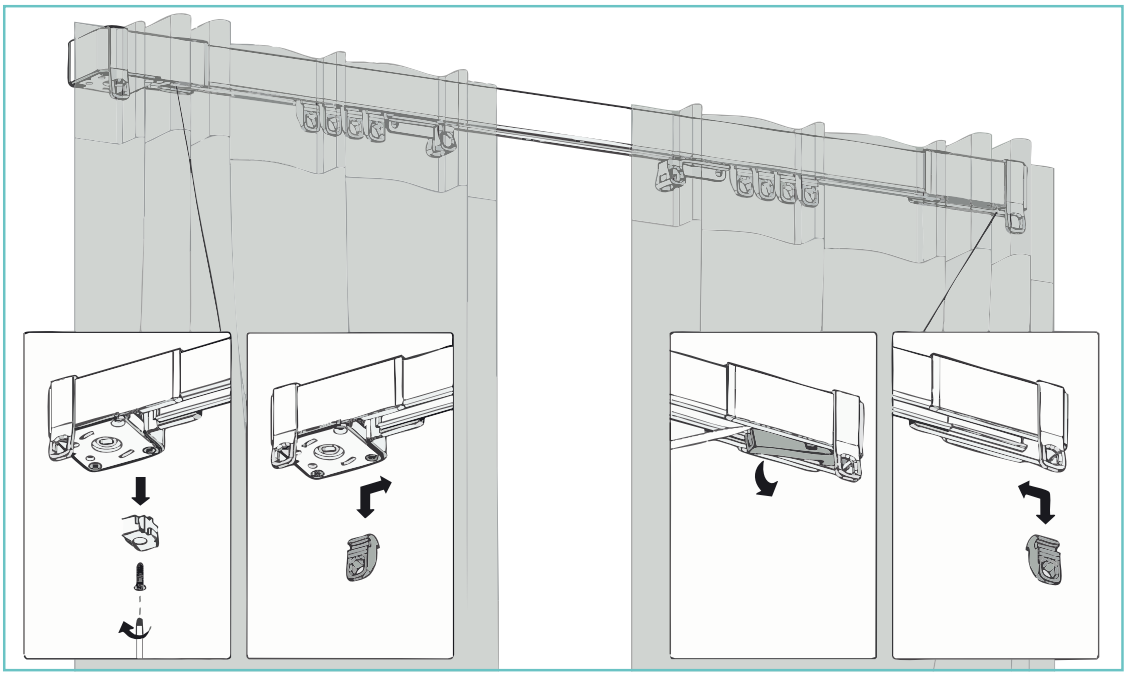

Turn the battery onto the motor

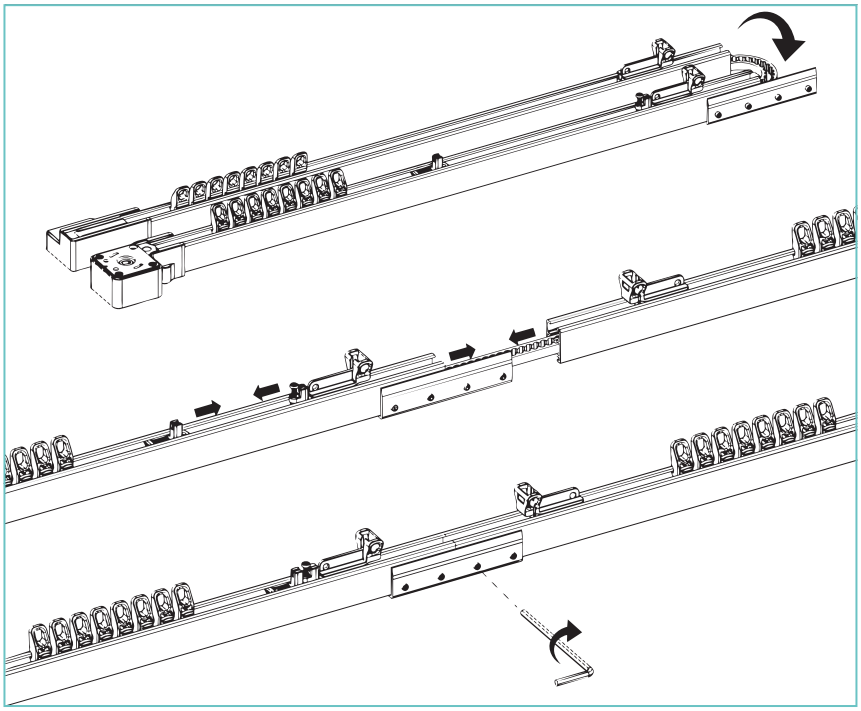

Optional

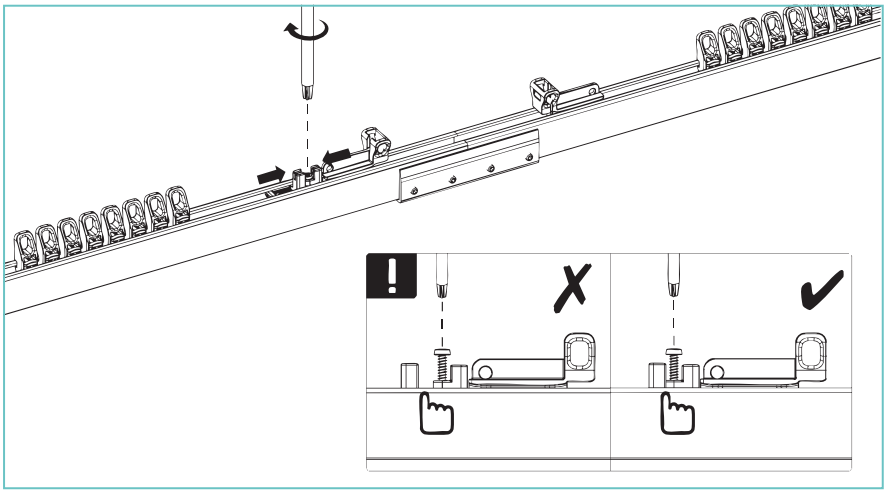

1 Add / Remove gliders

2 Coupled curtain rail

2.1 Standard gliders

2.2 Twist gliders
