Manual

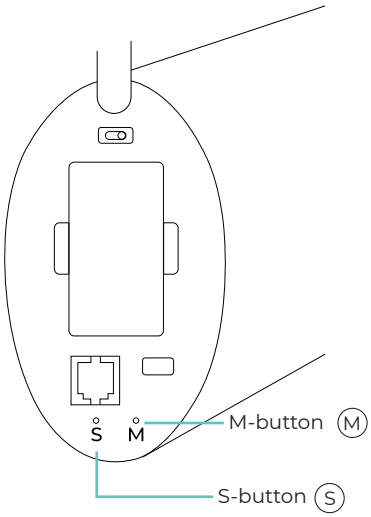

DIAZ | SUNPROTECTION

Curtain rail Somfy Glydea 230V

Introduction

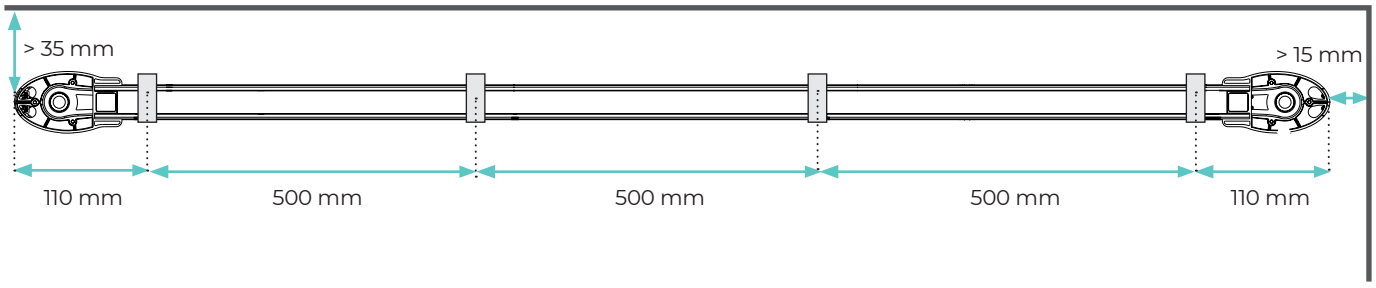

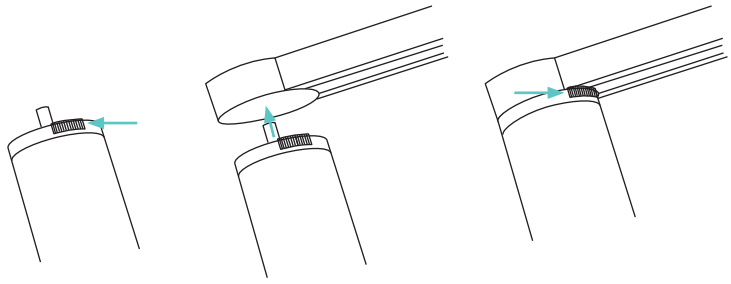

Installation of the brackets

1 Install the first and last brackets at about 11 cm from the ends of the rail.

2 Divide the other brackets evenly between the outer brackets.

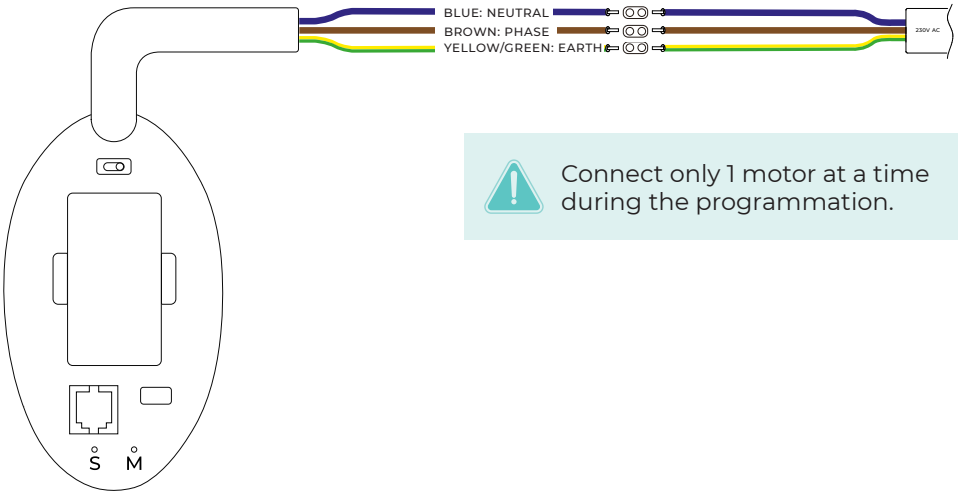

Installation of the motor onto the rail

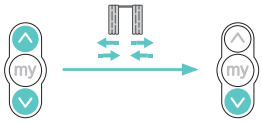

Connect the power 230V (RTS)

1 Connect the motor

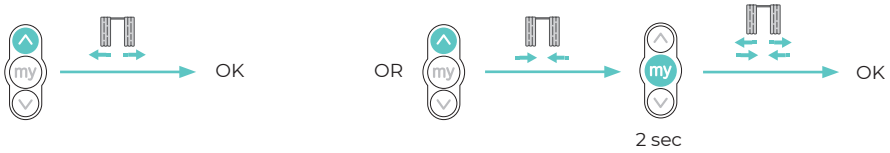

Connect only 1 motor at a time during the programmation.

2 Connect the RTS control to the motor

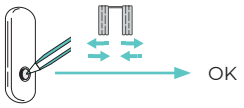

Attach the curtain to the rail before the programmation. With the first command the curtain will open and close completly, to determine the end positions.

3 Check sense of direction

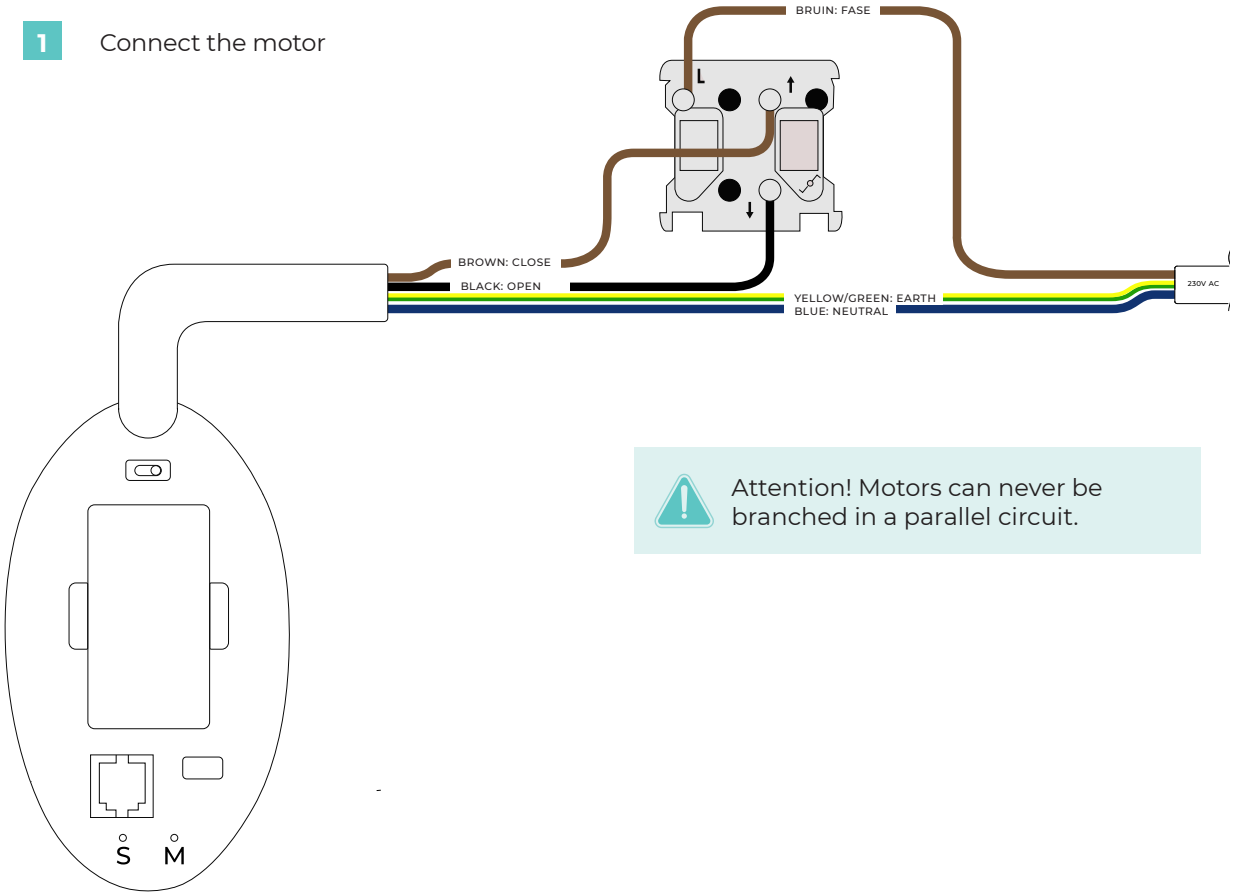

4 Programmation of the remote control

Connect the power 230V with switch control (WT)

1 Connect the motor

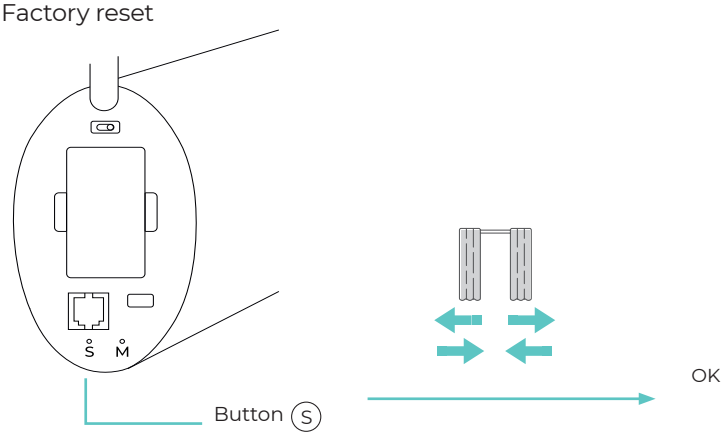

Attention! Motors can never be branched in a parallel circuit.

2 Check sense of direction

To adjust the direction, the black & brown thread should be changed in the switch.

Probleemoplossing

1 Factory reset

Push in till motor reacts 3x
