DIAZ | SUNPROTECTION

## Motion Bluetooth mid-motor with external battery/transformer programmation via app

## Introduction

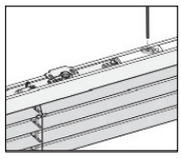

Before installation, ask your client to verify if he has the latest IOS version on his smartphone.

If your motor doesn't respond as described in this manual, please proceed to troubleshooting (pg 3).

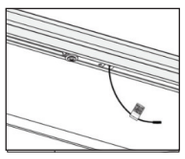

Push the programmation button P1 1x to (de)activate the programmation mode

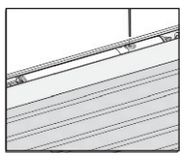

Pleated blinds

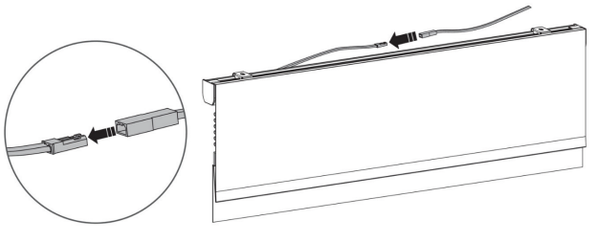

Roman blinds

Venetians

## Quick start guide

**1** Connect the electricity

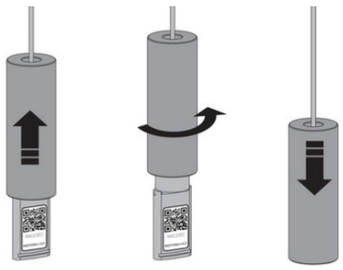

Connect only a 12V transformer DC or rechargeable batterypack.

**2** Download the Motionblinds Bluetooth app (if it hasn't been done before the installation). See p3.

**3** Open the Motionblinds Bluetooth app and click the + button.

**4** Choose the correct product.

**5** Click on Scan Setup Code and scan the QR code that you find in the tassel.

## Optional

**1** Adjust upper and lower limit

1.1 Open the settings of the motor in the app.

1.2 Choose upper limit, change it by clicking up/down buttons. Click save upper limit.

1.3 Choose lower limit, change it by clicking up/down buttons. Click save lower limit.

**2** Favorite position★

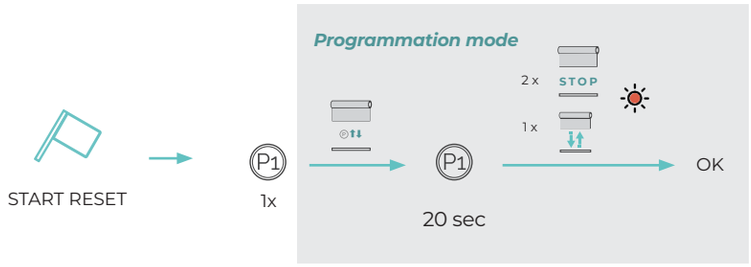

2.1 Open the settings of the motor in the app. Choose favorite position. Go to favorite position and click done.

2.2 Go to favorite position.

## Troubleshooting

1. Delete the product from the app.
2. Factory reset.

3. Click the + button. Follow the instructions on the screen.
4. Open the settings of the motor in the app.
5. Programm your product.
   - 5.1 Check rotational direction
   - 5.2 Save upper limit
   - 5.3 Save lower limit

Always leave a gap of +- 1 cm between the first slat and the headrail for venetian blinds in alu and wood. The cords must certainly not be under tension, as this can cause rapid wear and tear resulting in cord breakage.

If you have any further questions about the programming of this type of motor, scan the QR code and ask your question.
