WARNING! Installation Child Safety!

CHILD SAFE PRODUCT

- Young children can suffocate in the loop of the operation cords, chains,tapes and cords with which you operate your window decoration. They can also wrap the cords around their neck.
- Keep the cords out of reach of young children to avoide strangulation and suffocation.
- Place beds, cribs and other furniture away from the cords of the window decoration.
- Do not tie the cords. Make sure the cords do not get strangled or make a loop.
- Install and use the delivered parts for child safety according to the installation instructions to reduce the risks of strangulation and suffocation.

All our blinds are conform to the European “Child Safety” standards (EN13120).

User manual

By pulling the chain, you will let down and pull up the fabric of the duo-roll. When the duo-roll is installed, make sure that the fabric hangs neatly in the middle of the tube. If this isn't the case, please slide by hand the fabric at the front and back to the middle. When operating the duo-roll you need to pay attention that the hem bar isn't pulled up into the cassette. In both cases, this can lead to damage of the fabrics.

Dismounting of the SMART system
