Manual

DIAZ | SUNPROTECTION

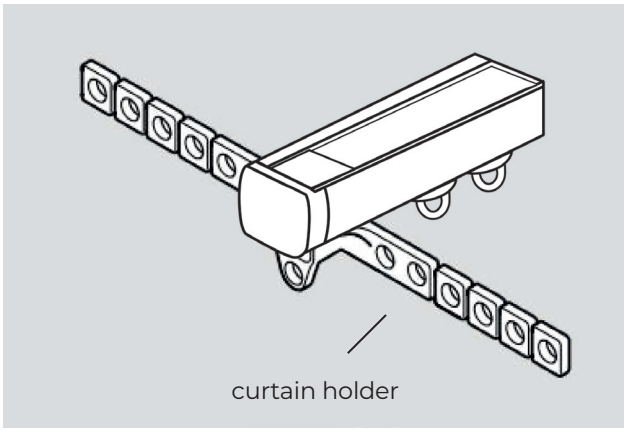

Installation of Twist curtain onto manual rail (820/860)

Introduction

Rail 820

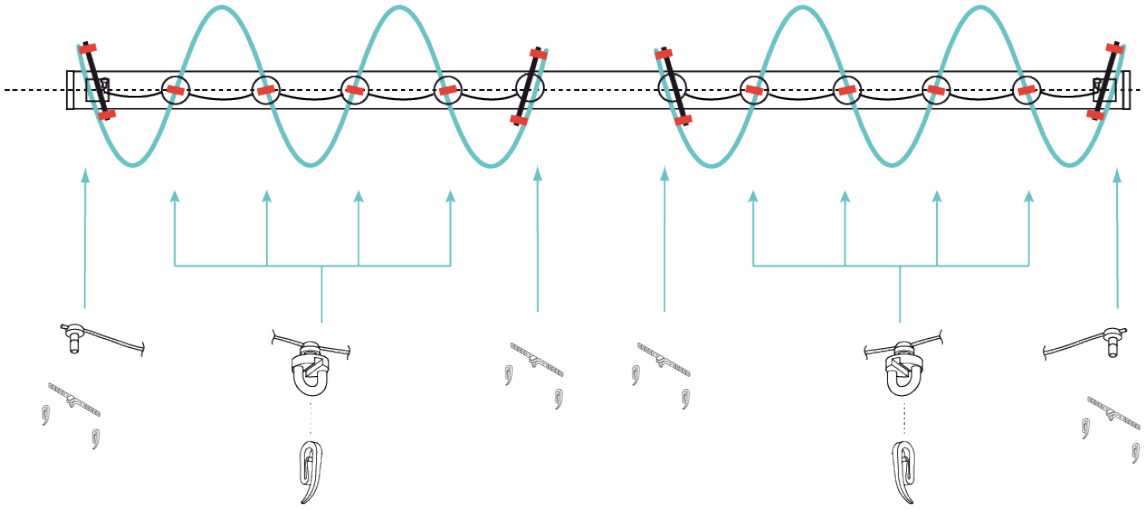

Rail 860

Installation Twist curtain

1 To obtain a nice final pleat for Twist confection, we attach curtain holders to the rail.

2 Attach 2 hooks per curtain holder, the continue by attaching the remaining hooks to the glides in the rail. When you have a left/right package, you have another curtain holder in the middle per package, so you attach 2 hooks each time.

When buying both curtain rails and curtains from Diaz, you should remove the provided pilot hook from the curtain, as you do not need to attach it to the curtain holders.
